REKHA SELVASEKARAN

Data Analyst | Business Intelligence | Analytics | Dashboard Design

Location: Dublin, OH
Phone: 484-478-3198
Email: rekhaselva26@gmail.com
LinkedIn: linkedin.com/in/rekhaselva
Portfolio: rekha-selva.github.io

4 yrs experience | 10**+ stakeholders served** | 30**% reporting effort saved** | 200**+ data issues resolved**

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with **4** years of experience turning complex datasets into business impact. Following a background in Electronics Engineering, completed a focused self-study period building **SQL, Power BI**, and Tableau skills before transitioning into a full-time analyst role. Proven track record of building dashboards adopted by **10**+ stakeholders, automating reports that eliminated 30% of manual effort, and resolving **200**+ data quality issues that directly improved reporting accuracy. Delivers actionable insights to executive and cross-functional teams with a structured, engineering mindset.

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX, Data Modeling), Tableau
Data & Query: SQL (Joins, Aggregations, CTEs, Data Validation), Advanced **Excel** (Pivot Tables, Power Query)
Cloud & Pipeline: Microsoft **Azure**, Azure Data Factory, Azure **Pipelines**
Analytics: KPI Development, Dashboard Design, Executive Reporting, Business Performance Analysis, ETL Concepts
Data Engineering: Data **Cleaning**, **Transformation**, **Validation**, **Harmonization** across POS, Marketing & Syndicated datasets
Programming: Python (pandas, data manipulation basics)

PROFESSIONAL EXPERIENCE

Data Analyst
Jan 2024 – Present
Abbott Labs | Dublin, OH

- **Stakeholder Dashboards:** Designed and deployed Power BI dashboards used weekly by 10+ stakeholders to monitor sales performance, marketing metrics, and KPIs — enabling faster, data-driven decisions across departments.
- **Reporting Automation:** Automated 5+ recurring reports using Power BI and Excel, cutting manual reporting effort by 30% and freeing analyst bandwidth for higher-value analysis.
- **Data Quality:** Identified and resolved 200+ data inconsistencies through SQL validation and cleansing, directly improving accuracy of enterprise-level reporting.
- **SQL Data Integration:** Engineered SQL queries with joins, aggregations, and transformations to consolidate internal and syndicated datasets into a centralized reporting model.
- **Executive Reporting:** Delivered analytics presentations to leadership on performance trends, risk areas, and growth opportunities across sales and marketing functions.
- **Data Operations:** Managed end-to-end data ingestion, harmonization, and transformation pipelines across POS, marketing, and syndicated data sources.

Data Analyst
Feb 2022 – Nov 2023
Spark IT Technologies | USA

- **Dashboard Migration:** Converted legacy Business Objects reports into Tableau dashboards, improving reporting accessibility and enabling self-service analytics.
- **Interactive Visualizations:** Built heat maps, scatter plots, geographic maps, and box plots supporting operational performance analysis across multiple business units.

- **Advanced Features:** Implemented drill-down navigation, dynamic parameters, calculated fields, and custom filters enabling independent data exploration.
- **KPI Development:** Designed metrics and performance benchmarks to support business tracking and identify trends against targets.
- **Data Integration:** Combined multi-source relational databases using SQL and Tableau data blending, delivering unified reporting across previously siloed datasets.

CAREER TRANSITION — SELF-DIRECTED ANALYTICS TRAINING

Self-Directed Study & Projects — Jun 2021 – Jan 2022

Following 2+ years as an Electronics Engineering Lecturer, made a deliberate transition into data analytics through structured self-study in SQL, Power BI, and Tableau — building hands-on project experience before entering a professional analyst role.

Road Accident Analysis Dashboard Power BI | DAX | Excel

- Built a Power BI casualties report analyzing 58,000+ UK road accident records across 2021 and 2022 — 5 KPI cards (total casualties, fatal, serious, slight) each with YoY % change vs prior year.
- Designed CY vs PY monthly trend line, casualties by vehicle type, road type bar chart, Urban/Rural donut, light condition donut, and a Bing geographic hotspot map across the UK.
- DAX measures for current year totals, prior year comparisons, and YoY variance — 195.7K casualties tracked, fatal incidents down 33.3% YoY.

Sales Performance Dashboard Power BI | Tableau | SQL

- Analyzed 50,000+ regional retail transactions; built interactive dashboards with drill-downs by region, product, and time period.
- Engineered SQL extraction and transformation pipeline ensuring a clean, performant data model before loading into the BI layer.

Customer Segmentation Analysis SQL | Tableau

- Segmented 30,000+ customer records by purchase frequency and revenue contribution; identified high-value cohort driving majority of total revenue.

EDUCATION

Bachelor of Engineering — Electronics & Communication — 2013

Anna University | Tamil Nadu, India

Lecturer — Electronics Engineering — Jul 2015 – May 2017

Pallavan Polytechnic College | Tamil Nadu, India
